Sleep Is Redefined

Otelsan redefines the sleeping experience by combining comfort, functionality and professional hospitality standards with a contemporary approach to design and manufacturing. Developed for hotels and accommodation facilities, Otelsan sleeping solutions are produced with carefully selected materials, reliable manufacturing methods and a strong focus on long-term guest comfort.

With extensive experience in the hospitality industry, Otelsan offers a wide range of professional hotel beds, bed bases, headboards, extra bed solutions and complementary hotel textile products. Different dimensions, materials and functional options allow the collection to meet the needs of various hotel concepts and projects.

Quality, durability, customer satisfaction and operational efficiency are at the core of every Otelsan product. With flexible production capabilities, Otelsan provides both standard and project-specific solutions for hotels, architects, designers and procurement professionals.

Serving customers in Türkiye and international markets, Otelsan continues to strengthen its position as a trusted hospitality partner through innovation, reliable production and continuous development.

Otelsan — Professional comfort, redefined.

Comfort

Believing that quality sleep is essential to an exceptional guest experience, Otelsan places comfort at the heart of every product. Carefully selected materials, modern manufacturing technologies and functional design solutions come together to provide reliable, long-lasting comfort for hotels and professional hospitality environments.

Warranty

Otelsan places quality, reliability and customer satisfaction at the center of its production philosophy. By combining industry experience with modern manufacturing technologies and strict quality control standards, Otelsan delivers durable products supported by dependable after-sales service. Continuous improvement and long-term customer satisfaction remain fundamental to the brand's commitment to quality.

Solution-Focused

Drawing on its experience in the hospitality industry, Otelsan develops flexible and customized solutions for different hotel concepts, room types and operational requirements. Product dimensions, materials, features and design details can be adapted according to project needs, allowing Otelsan to provide functional and reliable solutions for both standard applications and tailor-made hospitality projects.

Experience and Trust

Otelsan combines its long-standing experience in the hospitality industry with modern production technologies and a continuously developing product range. By focusing on consistent quality, durability and customer satisfaction, Otelsan has built lasting relationships with customers in Türkiye and international markets, strengthening its reputation as a reliable partner for professional hospitality projects.

SUSTAINABILITY POLICY

Sustainability

At Otelsan, we believe that creating lasting comfort also means taking responsibility for the future. Sustainability is an important part of the way we approach design, production and long-term business development. By using resources responsibly, improving production efficiency and focusing on durable products with long service lives, we aim to reduce waste and create greater value with every product we manufacture.

Our approach is built around three essential principles: People, Planet and Sustainable Growth.

People

Our people are at the heart of Otelsan. We are committed to providing a safe, respectful and professional working environment where experience, craftsmanship and continuous development are valued. We believe that long-term success comes from strong teams, responsible working practices and lasting relationships with our customers, suppliers and business partners.

Planet

We continuously evaluate our production processes with the goal of using materials, energy and resources more efficiently. Waste reduction, responsible material selection, efficient production planning and the development of durable products are important elements of our environmental approach.

By designing products for professional hospitality environments where intensive daily use is expected, we also focus on longevity. Extending product life, reducing unnecessary replacement and improving material efficiency contribute directly to a more responsible use of resources.

Sustainable Growth

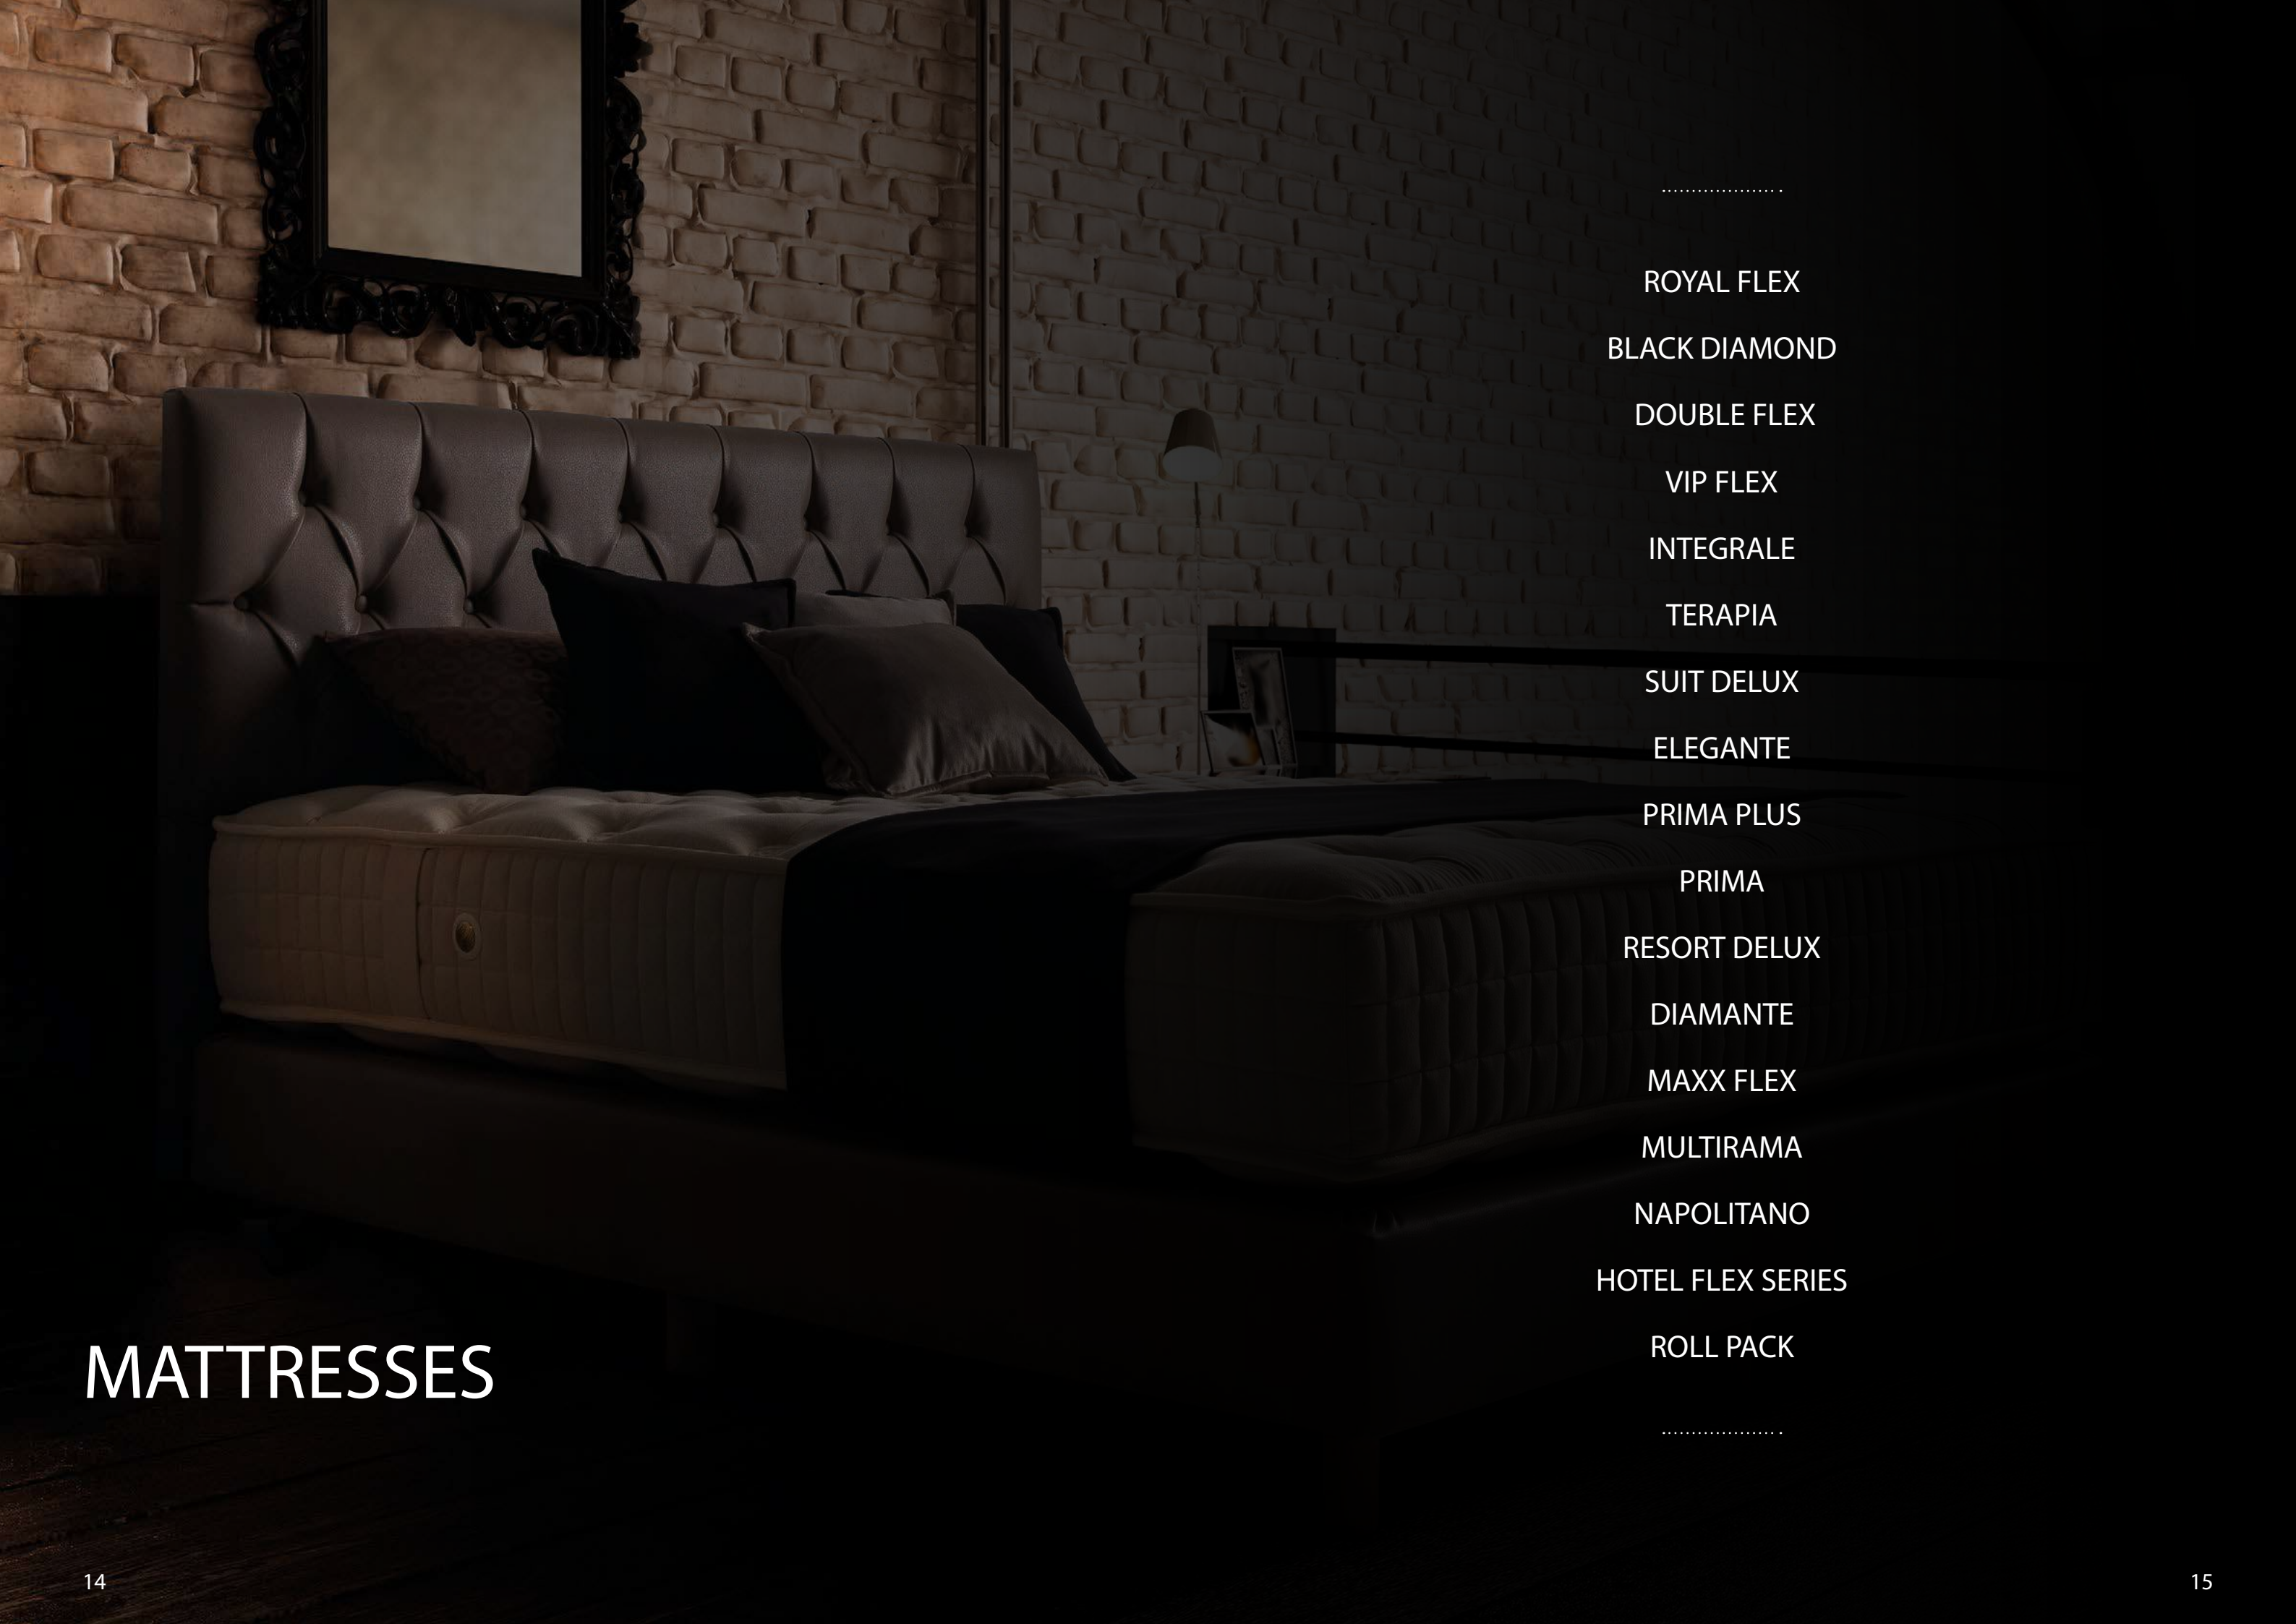

For Otelsan, sustainable growth means creating long-term value rather than focusing only on short-term results. We continue to invest in production capabilities, product development and international markets while maintaining our commitment to quality, reliability and responsible manufacturing.

As we grow, our objective is to improve efficiency, reduce our environmental impact and develop solutions that meet the evolving expectations of the global hospitality industry.

Our Commitment to the Future

Otelsan continues to explore more efficient production methods, responsible material alternatives and opportunities to reduce energy consumption and emissions throughout its operations. Our goal is to continuously improve our environmental performance while delivering durable, functional and high-quality products.

Through responsible production, innovation and continuous improvement, we aim to contribute to a more sustainable hospitality industry and leave a stronger foundation for future generations.

ROYAL FLEX

Air-Flow Pocket Spring System

Advanced pocket spring technology combines coils with different support characteristics to improve air circulation and provide balanced body support. Individually responding springs adapt to different pressure areas such as the shoulders, back and hips, helping create a more comfortable sleeping experience.

1,000 Coils per m²

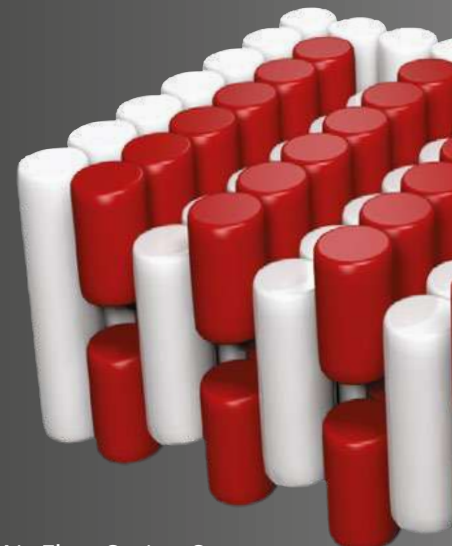

Approximately 1,000 individually pocketed springs per square metre respond independently to body movement, helping distribute pressure evenly while providing stable and adaptive support.

Open-Cell Foam

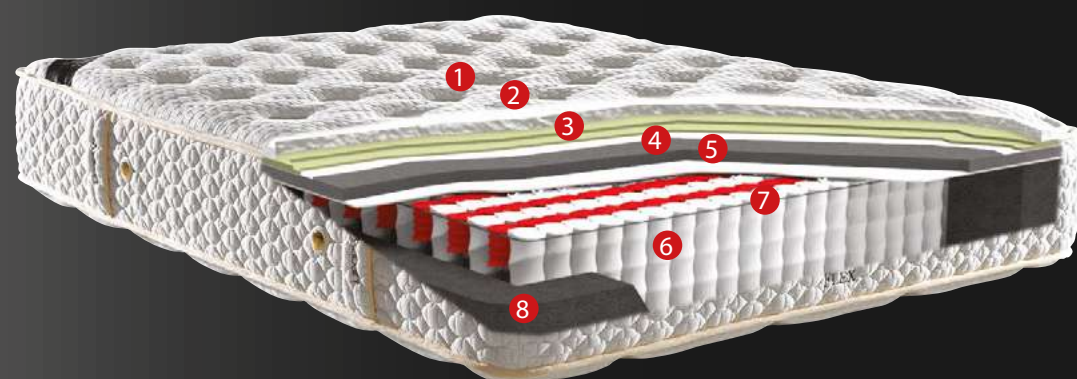

The open-cell structure allows greater airflow compared with conventional foam structures. Enhanced air circulation supports a fresher sleeping environment while providing comfortable and consistent body support.

Mattress Height: 32 cm

Firmness Level

Air-Flow Spring System

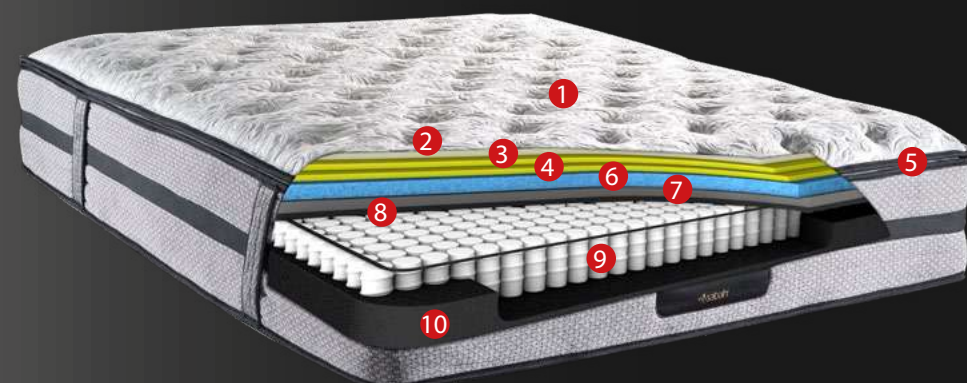

1. 500 gr/m² double jersey fabric
2. Polyester padding
3. Soft-touch foam

BLACK
DIAMOND

Multi-Layer System

The multi-layer structure combines gel-infused memory foam with an advanced pocket spring system to deliver balanced comfort and support. While the pocket springs respond independently to body pressure, the gel memory foam layer helps reduce pressure points and regulate sleeping temperature.

Body Temperature Regulation

Micro-gel particles within the memory foam help improve airflow and support temperature balance throughout the night, creating a fresher and more comfortable sleeping environment.

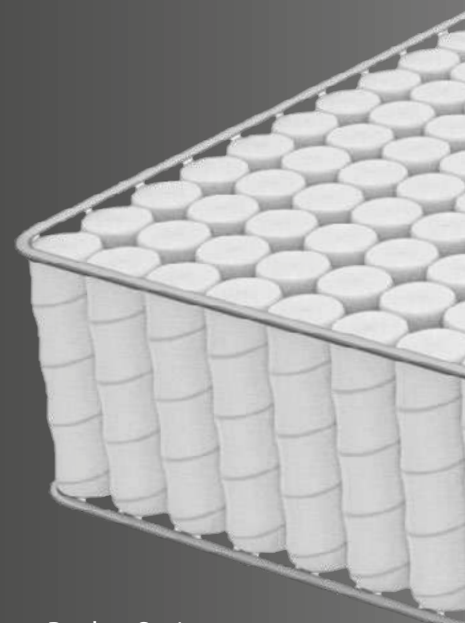

Advanced Pocket Spring System

Individually operating pocket springs adapt to body movement and provide targeted support across different pressure zones, helping maintain balanced spinal support and sleeping comfort.

Removable Zip-Off Top

The removable upper comfort layer can be easily separated and renewed when required. This practical design allows the comfort layer to be replaced without changing the entire mattress, helping extend product life and maintain long-term comfort.

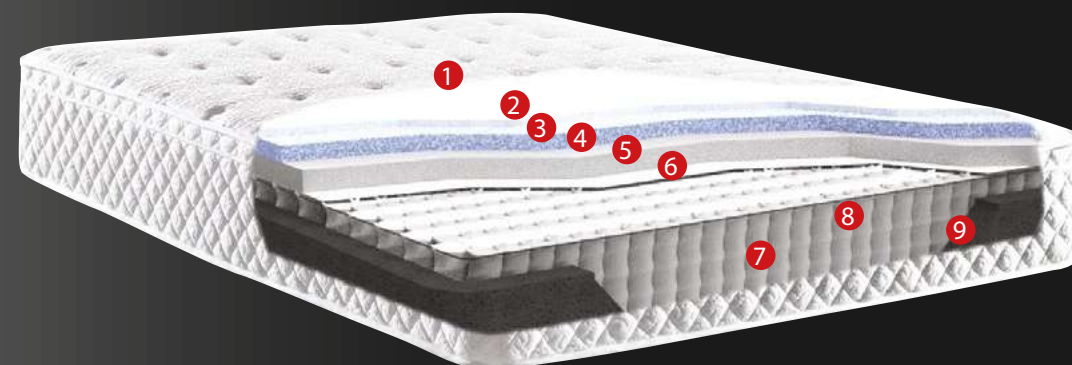

Mattress Height: 32 cm
Firmness Level: Medium Firm

DOUBLE FLEX

1. First quality damask ticking
2. Cool-Touch layer
3. Cool-Feel Blue Drops Powder technology
4. Soft-touch foam
5. Back Support HR foam
6. Soft Isolation felt
7. 900 count pocket spring
8. Metal frame
9. Edge support foam

DOUBLE FLEX

EuroTop Comfort Layer

The EuroTop design provides an additional comfort layer across the mattress surface, enhancing softness while maintaining balanced support for a more comfortable sleeping experience.

900 Coil Count

Approximately 900 individually pocketed springs distribute body weight evenly, provide targeted support and help reduce pressure on different areas of the body.

Cooling Comfort Technology

Breathable comfort materials help regulate body temperature and improve airflow, supporting a fresher and more comfortable sleeping environment.

Soft-Touch Comfort Layer

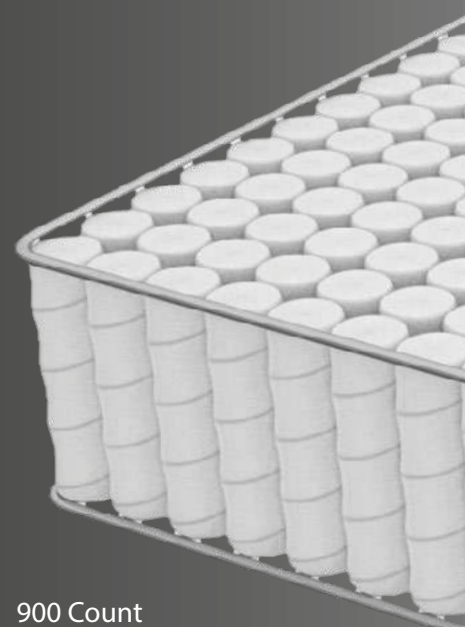

A soft and breathable upper padding layer enhances surface comfort and provides a pleasant touch while supporting effective air circulation.

Advanced Back Support

A high-resilience support layer works together with the pocket spring system to provide balanced pressure relief and additional support for the back and body.

Mattress Height: 33 / 34 cm

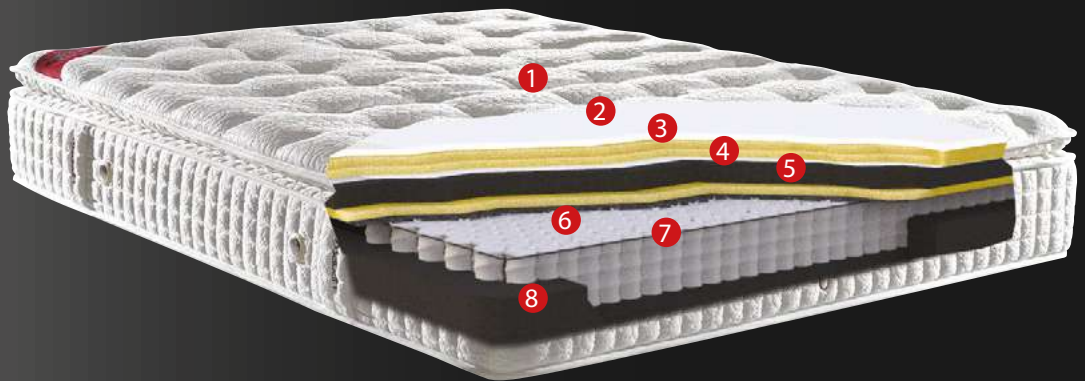

Firmness Level

900 Count

VIP FLEX

1. 380 gr/m2 double jersey fabric
2. Polyester padding

4. Back Support foam layer
5. Isolation layer
6. Sophisticated Pocket Spring System
7. Metal frame
8. Edge support foam

Pillow-Top Comfort

The additional pillow-top layer enhances surface softness and creates a more luxurious sleeping experience. Designed for hotel environments, it provides an inviting level of comfort while maintaining balanced body support.

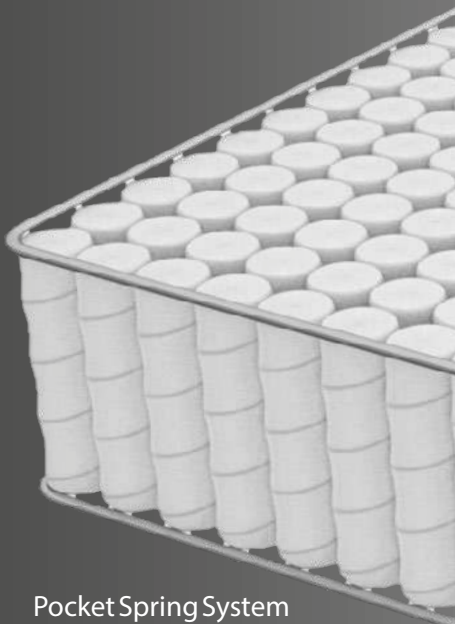

Advanced Pocket Spring System

Individually pocketed springs respond independently to body movement, helping distribute weight evenly and provide targeted support across different pressure zones throughout the night.

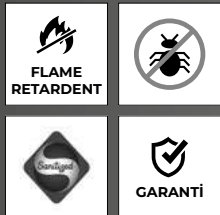

Reinforced Edge Support

A reinforced edge structure provides additional stability around the mattress perimeter, helping maintain its shape and offering reliable support when sitting or sleeping near the edge.

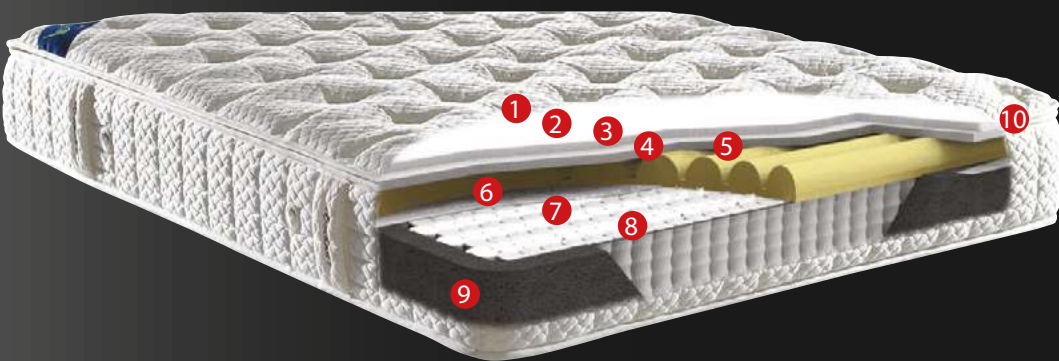

Mattress Height: 34 / 36 cm

Pocket Spring System

INTEGRALE

7. Nested pocket spring
8. Metal frame
9. Edge support foam
10. Zip-off top

Zip-Off Top

The removable zip-off comfort layer allows the upper section of the mattress to be renewed without replacing the entire mattress. This practical design helps extend product life and maintain long-term sleeping comfort.

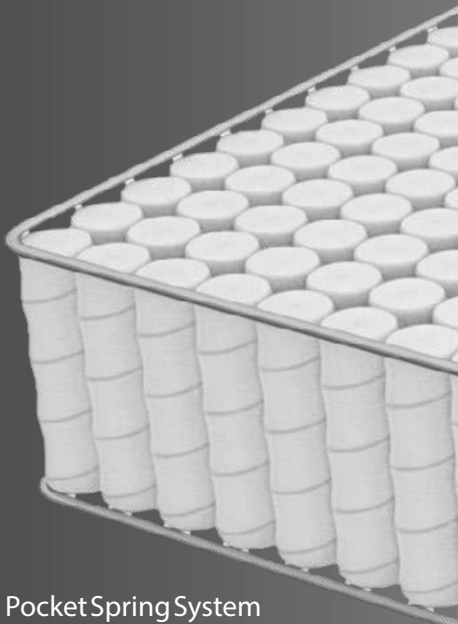

Superior Pressure Relief

A specially structured comfort foam layer helps reduce pressure on high-contact areas such as the shoulders, back and hips, supporting a more balanced and comfortable sleeping position.

Improved Edge Support

A reinforced perimeter structure provides additional stability around the mattress edges. High-density support foam helps maintain shape, improves durability and offers reliable support across the full sleeping surface.

Mattress Height: 30 cm

PocketSpring System

TERAPIA

Multi-Pocket Spring Technology

Designed for professional hotel use, the multi-pocket spring system combines different spring configurations to provide balanced and targeted body support. Independently responding springs adapt to different pressure zones for a more comfortable sleeping experience.

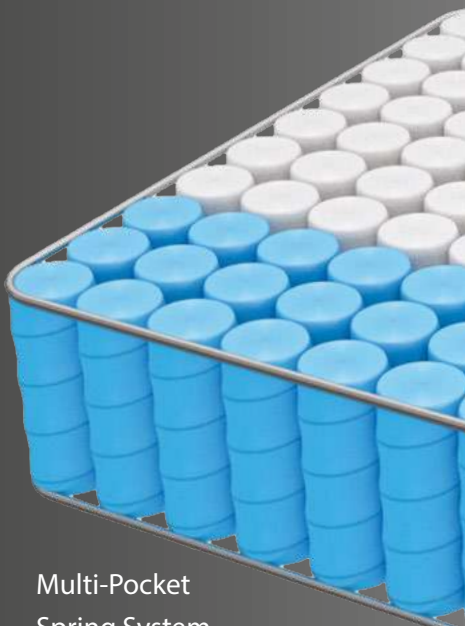

Comfort Support

A high-resilience comfort layer provides additional pressure relief and stable body support, helping maintain long-lasting comfort throughout the night.

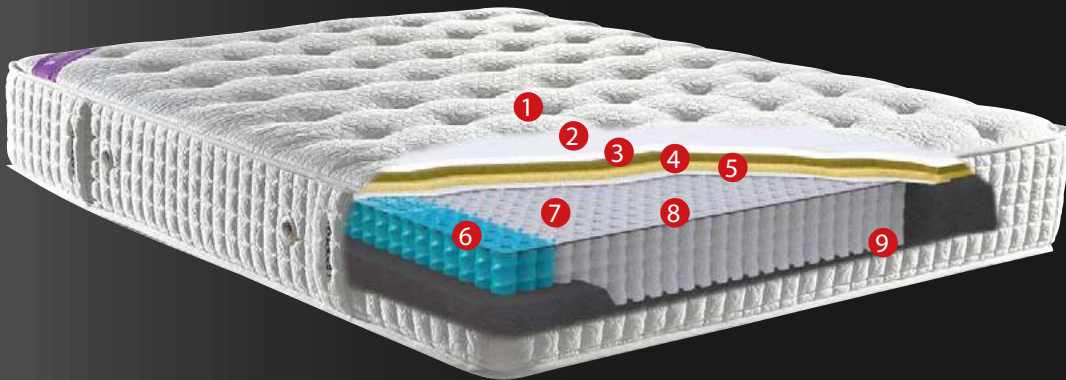

Hypoallergenic Top Layer

A soft, hypoallergenic polyester padding layer enhances surface comfort while supporting a cleaner and more comfortable sleeping environment.

Mattress Height: 32 cm

Multi-Pocket Spring System

Elegante

Specially Designed Spring System

A reinforced dual-layer spring structure is designed to provide enhanced resilience and stable support. The combined spring configuration helps improve durability while maintaining balanced sleeping comfort.

Optimal Support

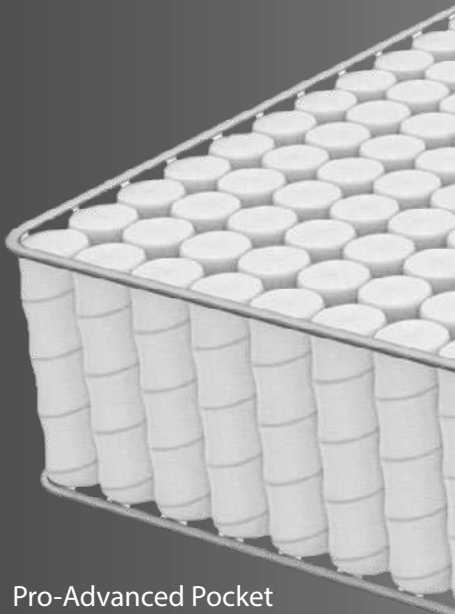

Independently responding springs adapt to body movement and different pressure zones, helping distribute weight evenly and provide consistent support throughout the night.

HR Foam

A high-resilience foam layer enhances comfort and structural stability while supporting effective air circulation within the mattress for a fresher sleeping environment.

Mattress Height: 30 / 32 cm

Mattress height: 30 cm.

Pro-Advanced Pocket Spring System

PRIMA PLUS

Pocket Spring System

Individually pocketed springs respond independently to body movement, helping provide balanced support across different pressure zones while reducing motion transfer between sleeping areas.

No-Roll Together

The independent spring structure helps minimize partner disturbance and reduces the tendency for sleepers to roll toward the center of the mattress, supporting a more stable sleeping surface.

3 Layers of Premium Comfort

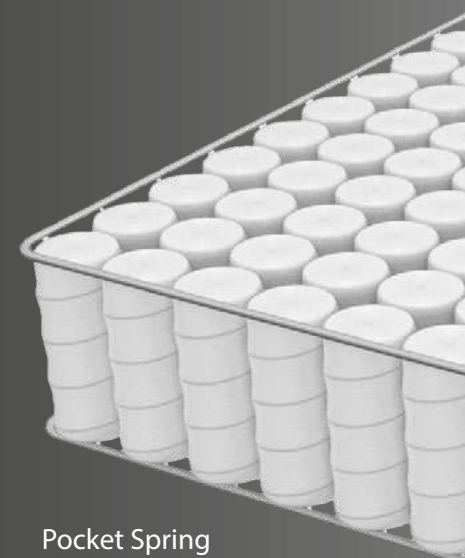

Multiple comfort layers combine high-quality foam and soft hypoallergenic padding to provide enhanced cushioning, durability and long-lasting sleeping comfort.

Premium Fabric

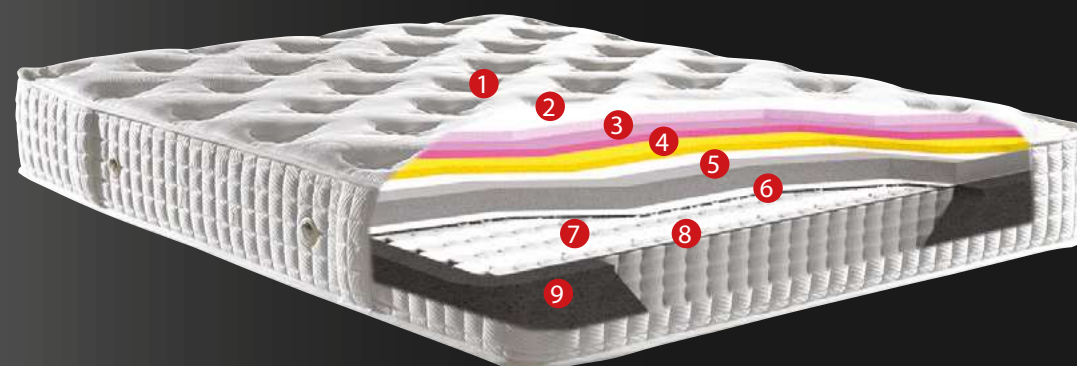

A soft double-jersey fabric enhances the surface feel of the mattress, providing a smooth and comfortable finishing layer suitable for professional hotel use.

PRIMA

Balanced Spinal Support

Individually responding springs adapt to the natural contours of the body, helping distribute pressure evenly and support a balanced sleeping position throughout the night.

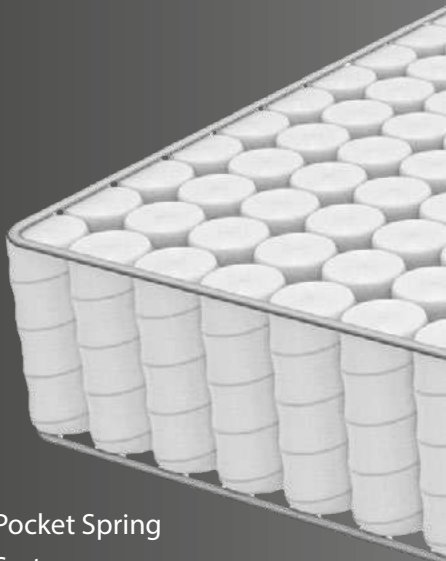

Back Support

A high-density comfort layer provides additional cushioning and support for different body types, helping reduce pressure points and enhance overall sleeping comfort.

Optimised Comfort

Carefully selected comfort foams provide balanced cushioning and ergonomic support, creating a comfortable sleeping surface suitable for professional hotel use.

Mattress Height: 26 cm

Pocket Spring System

RESORT DELUX

Pocket Spring System

Individually pocketed springs respond independently to body movement, helping distribute pressure evenly while reducing motion transfer and providing balanced support throughout the night.

Ideal Ergonomics

Designed to accommodate different sleeping positions and body types, the independent spring structure helps maintain individual comfort and minimizes disturbance caused by movement.

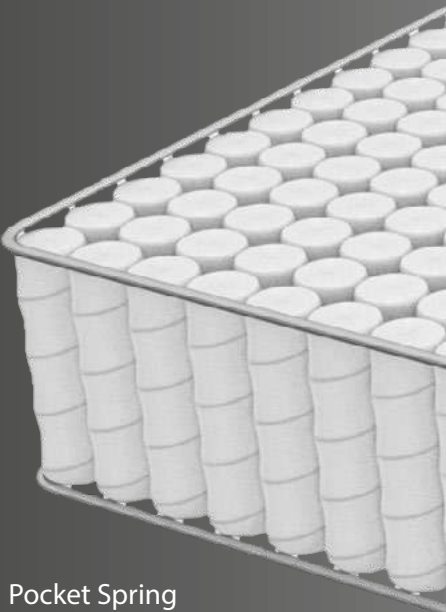

Reinforced Edge Support

A durable steel perimeter frame reinforces the mattress edges, helping maintain structural stability, prevent edge deformation and provide consistent support across the entire sleeping surface.

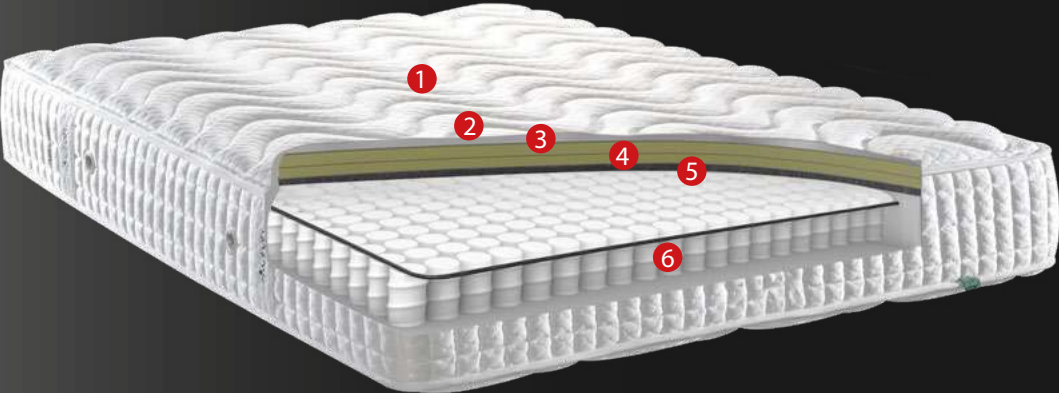

Premium Fabric

A soft-touch fabric with a weight of approximately 280 g/m² provides a comfortable and refined surface finish suitable for professional hotel use.

Mattress Height: 30 / 32 cm

7. Bonnell Spring System
8. Edge support foam

Ma~~xx~~-Flex

Bonnell Spring System

High-strength steel springs are interconnected with helical wires to create a stable and durable support structure, delivering reliable performance for professional hotel use.

Optional Coil Count

Available with approximately 130 or 175 coils per m², allowing the spring configuration to be selected according to the required level of firmness and support.

Premium Comfort

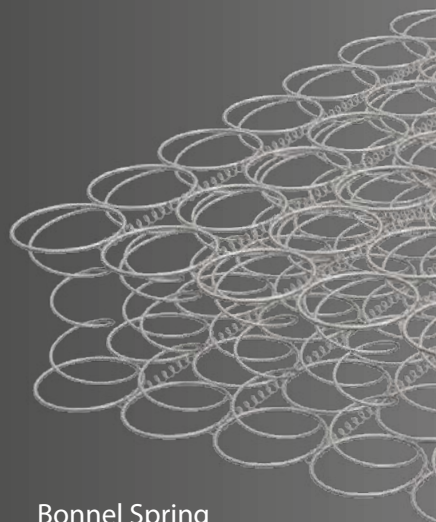

A combination of high-quality foam and soft hypoallergenic padding enhances surface comfort while providing balanced cushioning and long-lasting durability.

Premium Fabric

A soft double-jersey fabric with a weight of approximately 280 g/m² provides a comfortable and refined surface finish.

Mattress Height: 27 cm

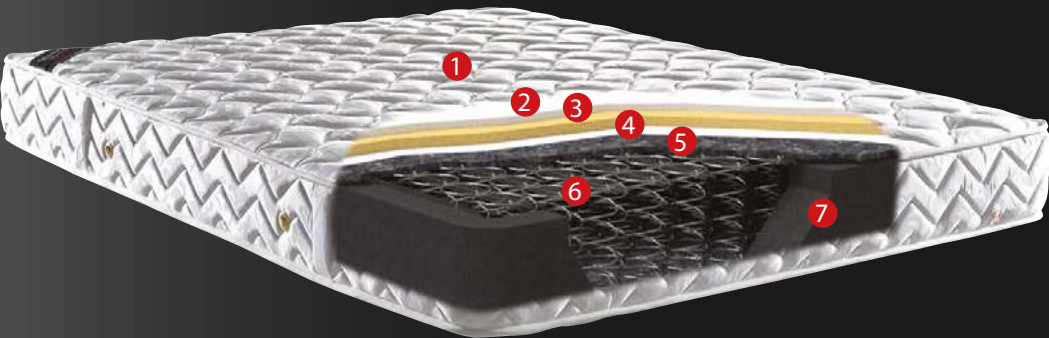

Firmness Level

Bonnell Spring System

MULTIRAMA

- 1. Jacquard woven ticking
- 2. Polyester padding
- 3. Soft-touch foam
- 4. Foam Layer
- 5. 800 gr/m² Isolation felt
- 6. Bonnell Spring System
- 7. Edge support foam

MULTIRAMA

Bonnell Spring System

Manufactured from 2.20 mm high-strength steel wire, the Bonnell spring system provides stable and reliable support. With approximately 130 coils per m², the interconnected spring structure helps maintain balanced firmness and long-term durability.

Back Support

A high-density foam layer adapts to body movement and helps distribute pressure evenly, providing balanced support and improved sleeping comfort.

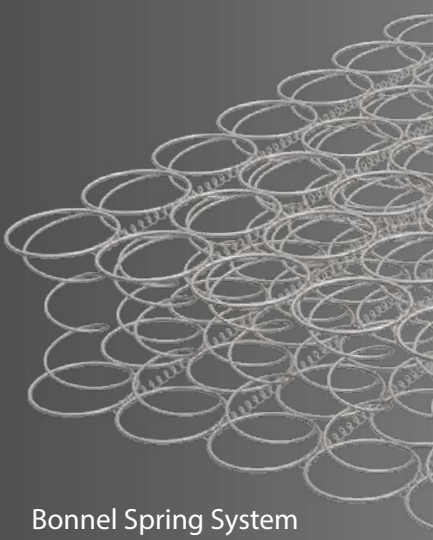

Durable Edges

Reinforced high-density edge support helps maintain the mattress shape, reduce sagging and maximize the usable sleeping surface.

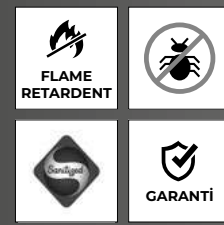

Ticking

Soft and durable cotton-polyester fabric provides a comfortable surface finish suitable for professional hotel use.

Mattress Height: 25 cm

Bonnell Spring System

NAPOLITANO

- 1. Jacquard woven ticking PES/PP
- 2. Polyester padding
- 3. Soft-touch foam
- 4. 800 gr/m2 Isolation felt
- 5. Bonnell Spring System
- 6. Edge support foam

napolitan

Bonnell Spring System

Manufactured from 2.20 mm high-strength tempered steel wire, the Bonnell spring system provides stable support, balanced firmness and reliable durability for professional hotel use.

Insulation Felt

A durable felt layer helps distribute body weight evenly across the spring system while providing additional structural support and protection between comfort layers.

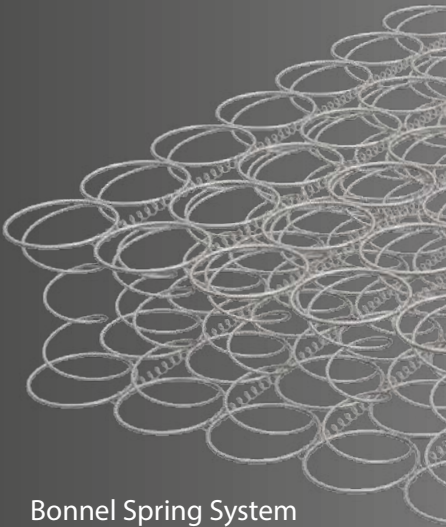

Comfort Layers

Premium foam combined with soft hypoallergenic polyester padding enhances surface comfort, supports pressure distribution and contributes to long-lasting durability.

Edge Support

High-density foam reinforces the mattress perimeter, helping maintain its shape, improve edge stability and maximize the usable sleeping surface.

Mattress Height: 22 cm

Bonnell Spring System

HOTEL FLEX SERIES

Hotel Flex 23

Bonnell Spring

Classic spring system made of steel wire. Each spring has been strengthened with high heat by heat treatment and its strength has been increased.

Fabric

PES/PP Flame retardant jacquard woven fabric

Mattress height: 23 cm.

Frame Foam

By making the entire spring frame circumference with a foam frame, both the edges are strengthened and the entire surface is used.

Hotel Flex 26

Bonnell Spring

Classic spring system made of steel wire. Each spring is heat treated, strengthened with high heat and its strength is increased. It has a high resistance spring carcass made of 2.40 mm steel wire with 6 turns and a head diameter of 80 mm.

Fabric

PES/PP Flame retardant jacquard woven fabric

Mattress height: 26 cm.

Block frame edge support

Edge Support Support sponge that surrounds the entire spring unit, allowing use of the entire surface from edge to edge.

Hotel Flex 30

Bonnell Spring

Classic spring system made of steel wire. Each spring is heat treated, strengthened with high heat and its strength is increased. It has a high resistance spring carcass made of 2.40 mm steel wire with 6 turns and a head diameter of 80 mm.

Fabric

PES/PP Flame retardant jacquard woven fabric.

Mattress height: 30 cm.

Foam Layer

Filling material that supports the body weight proportionally and provides comfort by spreading the pressure homogeneously at the points of gravity.

Hotel Flex Pocket

Pocket Spring System

Maximizing point response and independent movement, reinforced Pocket Spring technology.

Fabric

Soft, plump, flexible and flame retardant knit fabric.

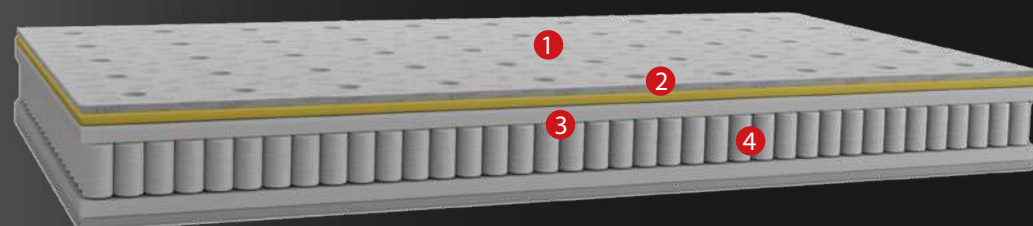

Mattress height: 30 cm.

Soft touch foam

Its flexibility is higher than that of conventional foams. It provides extra comfort and orthopedics. It is flexible and durable.

ROLLPACK

1. Double Jersey fabric
2. Visco elastic foam layer
3. Soft touch foam layer
4. Pocket spring system

-Production can be made according to your special technical demands.

Luxury Double-Jersey Fabric

Double jersey mattress fabric with high air permeability with its soft, plump and flexible structure.

Soft Touch Foam Layer

Its flexibility is higher than that of conventional foams. It provides extra comfort and orthopedics. It is flexible and durable.

Pocket Spring System

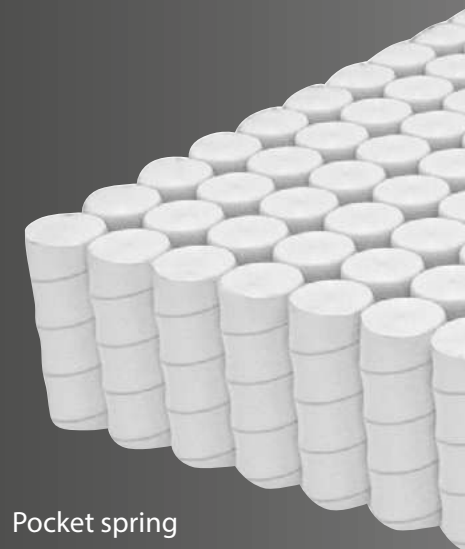

Pocket springs placed in fabric bags, each of which has the feature of independent movement, provide the most appropriate support for the body and spine structure.

Visco Elastic Foam Layer

Thanks to its flexible structure, it supports the body and the spine and provides extra orthopedics.

Mattress height: 26 & 30 cm

IF YOU DON'T HAVE A STORAGE AREA FOR EXTRABED,
THIS PRODUCT IS A PERFECT SOLUTION FOR YOU

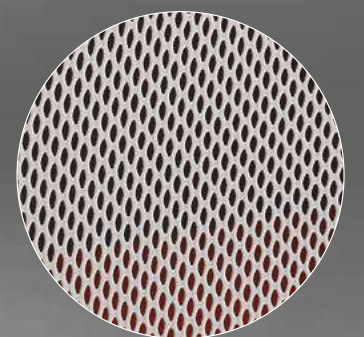

- Extra bed is stored under a normal bed and it can be wheeled out when needed
- No extra effort and time to move the extra bed room to room.
- Fast and easy to operate
- Extra bed part can be stored either in any size of bases.
- Standard price is valid for Napolitano model mattress on top.
- Recommended to be used as a separate extra bed in room but not use together next to main bed set.
- Should be operated by authorised hotel stuff only.
- Maximum loading capacity is 70 kg.

BABY FOLDING BED

COMFORTABLE, DURABLE AND EASY TO USE

- Less space when folded
- 10 cm mattress covered with jersey fabric.
- Mesh on side gives you visibility inside and provide air-circulation
- Removable and washable cover
- All corners are rounded for maximum safety

CUSTOM-MADE SOLUTIONS

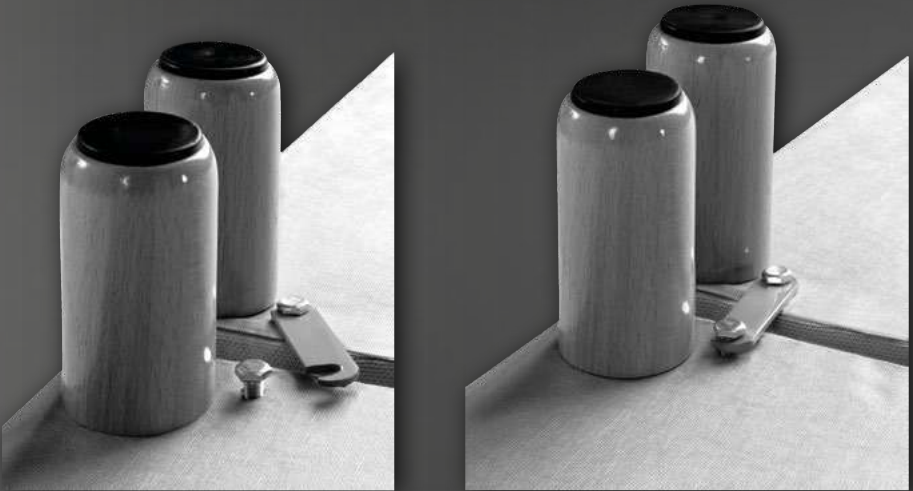

ZIP&LINK

Use them independently and have two single beds or one large. The zippers are situated on the sides at the top of the mattress and the bottom of the mattress to enable the mattresses to be joined together

BASE CONNECTION SYSTEM

COMFORT CONNECTION TOPPERS

A-THIN VERSION
Fastest way to connect two single mattresses and eliminate connection part feel. Top/Bottom fabrics are 100% Cotton, inner filling is Polyester fiber. Easy to operate. Washable.

B-THICK VERSION
With 3-4 cm thickness, it provides additional comfort to mattress and eliminates mattress connection feel. Easy to operate. Not washable and recommended to use under a mattress protector.
